A number of new additions have been added around School since the beginning of the Academic Year.

The Canteen has had a new LCD TV and DVD added. Our Science Labs have been equipped with a state of the art interactive Smart Board, with LCD projectors each able to provide 3 dimensional multi media pictures to stimulate our students for better learning. With

it we are able to present in greater depth and in a more interesting and creative way topics from many different areas being studied by our children.

Now we also have a new building erected to provide for a bigger and better Library equipped with new software and computers. Presently our Librarian is working to produce an on line Library children programme which you soon will be able to access from home and find out all about the exciting resources and new additions being added to our Library.
